PROFILE

Thank you for investing your time in me. In every sense of the word, I have an "appetite" for what I do, and it shows because I'm usually doing way too many things at once. Something that rings around my head a lot is: "I want to do my best work." My present ambition is to fully master a stack, so I can develop a real sense of identity when it comes to programming. We are not the tools that we use! What I'd like from you is the opportunity to learn.
